APPLICATION NO: 10/813,874

RE: Proposed amendment to claim 1

1. (Currently Amended) A repository system for media publishing, comprising:
a plurality of storage devices configured to store a plurality of media items, the plurality
of storage devices including a first storage device and a second storage device,
the first storage device configured to store a first type of media items, and
the second storage device configured to store a second type of media items ~~different from~~
~~the first type of media items,~~
wherein ~~a type of media items selected for the first type of media items and the second~~
~~type includes is defined by a series of publishing variables including:~~
a format, a bit rate, a communication protocol, physical medium, digital rights
management information associated with media items, and an encoding type and compression
technique used to reduce the physical size of the media items, and
wherein the second type of media items is defined by the same series of publishing
variables with at least one of the publishing variables having a different value from that of the
first type of media items; and
metadata information relating to the plurality of media items stored in said plurality of
storage devices,
wherein said metadata information enables hierarchical organization of the plurality of
media items so that the media items are easily accessed, moved, added, and deleted.
